Hiring Manager
Dallas, TX

Dear Hiring Manager,

My extensive experience and skills make me the ideal candidate for this job. I am in search of a full-time in order to learn new things and contribute to a respected company. I am interested in working on software development projects in an efficient agile workspace or work as and IT Support specialist.

I am a graduate of Texas A&M University - Commerce where I acquired a Bachelor of Science majoring in Computer Science and minor in Mathematics. While pursuing my degree I also worked as a Web Developer/IT Support specialist for Innovation First International. At this position I created and contributed to many projects using tools such as Laravel, Magento, Vue.js, and many more tools that implemented programming languages such as PHP, Javascript, HTML, and more. This experience allowed me to hone all of the skills I learned from my degree and truly made me confident in my abilities.

One web application that I wrote in Laravel handles an index of tens of thousands of SKUs. My job was to create a website that allows the user to search and filter through these records, as well as add/edit/delete with validation, automatically generate next available UPC, and export/import data. I also wrote software that is live on the Rack Solutions website where I used Vue.js to create a hot reloading calculator to calculate the power capacity of a server(<https://www.racksolutions.com/news/blog/server-rack-power-consumption-calculator/>). This was my first Vue.js project that I later embedded into a WordPress website, but have since implemented Vue.js in other ways which include creating a registration wizard for event registration for Vex's International Robot Competition.

I am excited to contribute to such a respected company that provides such great opportunities like this company.

I have attached my resume. There you can find everything there is to know about my many different skills in computer science. I am very interested in talking over the phone or in person about the next step in being a part of this company's team. Thank you for your time and I am looking forward to hearing back and see when I can begin.

Sincerely,

A stylized, handwritten signature in black ink, appearing to read 'Benjamin W. Driver'.
