EXPERIENCE

Web Development/IT Support - Innovation First International, Greenville,
TX, 6/2019 – present

- Utilized PHP 7, Laravel framework and Magento eCommerce platforms, advanced sql queries, referential integrity, constraints
- Git / Gitlab for source code version control
- Basic front-end development using HTML, CSS, and JavaScript
- Database design and management using MySQL as our primary database platform
- Advanced in MVC programming in Laravel
- Contributed to important websites for Vex Robotics World Championship that had the capabilities to register teams, distribute awards, show indexes of statistics, grants and vouchers, sales, and many more
- Created websites made to advertise robotics and engineering toys

- Advanced development in Vue.js framework. Developed hot reloading calculator so customers can make an educated decision when shopping for server racks
- Experience with search technology such as Algolia with facets(document type, competition year, language, published, etc.). Implemented Magento CMS pages so customers can search through an index of items
- Use SOLID principles in order to developed well rounded and organized projects

---
