SKILLS

Languages: PHP, SQL, PL/SQL, Python, JavaScript, Java, C++, XML

Frameworks & Tools: Magento 2, Laravel, Node.js, Vue.js, Oracle APEX, RabbitMQ, Composer, Selenium, Git, GitLab, Bitbucket

Databases: MySQL, Oracle, MSSQL, MariaDB

eCommerce & Integration: Magento Cloud, Digital Ocean, REST APIs, JSON Messaging, RabbitMQ Publish/Subscribe, 3rd-Party Module Integration, Algolia Instant Search

Architecture & Methods: OOP, OOD, MVC, ETL Pipelines, Closed-Loop System Design, Spec-Driven AI Architecture, Agile (Scrum), CI/CD

AI & Tooling: Spec-Driven Development, AI-Assisted Development (Copilot, Claude, Cursor)

EXPERIENCE

Traxxas

July 2020 – Present

Full-Stack Developer / Scrum Master

McKinney, TX

- Served as Scrum Master for an agile development team, leading daily standups, sprint planning, and task distribution across developers while remaining an active hands-on contributor
- Led architectural design of the Magento 2 + RabbitMQ integration platform, defining the publisher/consumer/queue structure and automated listener jobs for real-time JSON messaging across product, inventory, order, and content data streams
- Built custom Magento 2 modules from scratch following Magento architecture standards (registration.php, di.xml, plugin/observer patterns) and extended core and 3rd-party modules
- Architected end-to-end pipelines integrating Magento with Oracle APEX and MSSQL, including stored procedures and scheduled jobs, with closed-loop logic to automatically detect and correct data discrepancies
- Developed mobile-responsive Magento features and modules with a mobile-first mindset, ensuring consistent experience across web and mobile platforms
- Applied Spec-Driven AI Development workflows to define system architecture before implementation, improving delivery speed, reducing rework, and aligning technical decisions with business requirements

Innovation First International

May 2019 – June 2020

Web Developer / IT Support

Greenville, TX

- Contributed to Magento 1 to Magento 2 migration, handling infrastructure planning, CMS page transitions, and ensuring 3rd-party module compatibility across the new platform
- Managed Composer dependencies across Magento 2 and Laravel projects, coordinating version upgrades and maintaining package compatibility
- Integrated Algolia Instant Search into Magento 2 with custom faceted filtering, improving product discoverability and search performance
- Built and maintained Laravel applications using advanced MVC patterns, including automated PHP indexing jobs and MySQL data pipelines

EDUCATION

East Texas A&M University, Bachelor of Science

2016 – 2020

Computer Science, Minor in Mathematics
